

Mini-Project

Course Objective:

1. To develop a unique and innovative idea for a product or service in the form of a project report.
2. To understand the significance, feasibility, and detailed aspects of the proposed innovative idea.

Project/Practical Work/Seminar:

In the first semester, students are required to conceptualize an innovative idea for a product or service and prepare a comprehensive project report under the guidance of a faculty mentor. Each student will work individually on their report, which should include the importance, relevance, feasibility, and detailed description of the proposed idea. The report will be evaluated by an external examiner appointed by the university. Additionally, students will present their findings and insights through a seminar.
